EXPERIENCES

• Backend Developer

INNORIX Viet Nam

January 2025 - Present

- Contributed to Exacoola, a large-scale file transfer platform built with **Express.js**, supporting multi-GB file transfers across **major operating systems** and integrating with multiple **cloud storage platforms**.
- Designed distributed and asynchronous backend workflows using **RabbitMQ** for background jobs, agent commands, and file transfer processing; extracted monitoring functionality into an independent microservice using **gRPC** for scalable inter-service communication.
- Optimized complex **MySQL** workloads using **CTEs, indexing, transaction management, deadlock analysis, and connection pooling**, reducing query execution time by over **90%** while improving reliability under high-concurrency workloads in a **multi-tenant** architecture.
- Built scalable real-time communication using **Socket.IO** and **Redis Pub/Sub**; designed and maintained deployment environments using **K3s** for cloud platforms and **Docker Swarm** for on-premise infrastructure, with automated **CI/CD pipelines through Jenkins**.
- Engineered high-performance object storage transfers using **chunked upload/download, streams, and pre-signed URLs**, optimized cloud storage costs through **S3 lifecycle policies and storage-class transitions**.

• Backend Developer

Freelance

June 2024 - December 2024

- Developed a backend **API Gateway** using **NestJS** to integrate and standardize APIs from multiple transportation providers into a unified interface.
- Designed and maintained a modular backend architecture following **Object-Oriented Programming (OOP)** and **SOLID principles**.

• Frontend Developer Intern

FPT SOFTWARE

September 2023 - February 2024

- Developed and maintained responsive web interfaces using **React.js** and **SCSS**, following reusable component-based development practices.
- Collaborated with a five-member development team in an **Agile** environment, participating in sprint planning, task discussions, and code integration.
- Integrated frontend features with backend **REST APIs**, handled application state using **Redux**, and collaborated with backend developers to ensure smooth data flow and functionality.

EDUCATION

• FPT University

Bachelor of Software Engineering

Ho Chi Minh City, Viet Nam

December 2020 – March 2025

- Received the **Philosophy Talk 12 Certificate** for delivering a presentation on job hopping and career transitions, June 2024.

SKILLS

- **Programming Languages and Frameworks:** Golang, JavaScript, TypeScript, NestJS, Express.js, React.js.
- **Databases and Caches:** PostgreSQL, MySQL, MongoDB, Redis.
- **DevOps & Infrastructure:** Docker, Kubernetes, Jenkins, Kafka, RabbitMQ, AWS (ELB, IAM, Lambda...).
- **Other Technologies:** GraphQL, Elasticsearch.
